

## Precision Pulse Control

The PCX-7500-66 is an air-cooled, high power current source designed to drive laser diodes, bars, and arrays. The output current can be set from 10 A to 450 A, compliance voltage dependant on the model of system. The pulse width is adjustable between $4 \mu \mathrm{~s}$ to $5,000 \mu \mathrm{~s}$, with a frequency of 8 Hz to $10,000 \mathrm{~Hz}$.

## Ease of Setup and Operation

The PCX-7500-66 may be operated through its intuitive front panel controls. The color QVGA LCD provides immediate visual confirmation of all operating parameters, including pulsed current set points, internal trigger pulse width, internal trigger frequency, and error/fault messages.

## Complete System Integration

For automated applications, complete control of the instrument is provided through RS-232, USB and Ethernet computer interfaces. Up to four system configurations may be stored in internal non-volatile memory, providing instant recall of frequently-used configurations.

## Low Inductance Output Cable

The laser diode is connected to the PCX-7500-66 through a low impedance strip line cable, designed to preserve the fidelity of high-speed current pulses. The output connector is interlocked, so that the PCX-7500-66 is disabled when the connector is removed.

## Internal or External Triggering

Conveniently located front panel BNC connectors allow the PCX-7500-66 to be externally triggered and synchronized for specialized interconnected equipment applications. The input impedance of the trigger is selectable to either $50 \Omega$ or $10,000 \Omega$. The synchronization output pulse is synchronized to the leading edge of the output current pulse and is active with internal or external triggers.

## Notes

Warranty-One year parts and labor on defects in materials and workmanship.

The PCX-7500-66 current source meets or exceeds these specifications.

All specifications are measured with a low inductance strip line interconnect cable to the laser diode, with less than 4 nH total inductance.

Specifications subject to change without notice.
